

# CS771 Assignment 3

Apoorva Jain, Chaman Jangra, Sharwari Manoj Samdekar, Aakrati Jain, Vasudha, Karishma Satchidanand Laud

TOTAL POINTS

**116 / 120**

QUESTION 1

## 1 Method Description 40 / 40

✓ + 20 pts Description of the proposed method including how images were preprocessed (if at all), what algorithm was used to perform the final classification (kNN, CNN, kernels etc).

✓ + 20 pts Description of hyperparameters used in preprocessing and training stages including what ranges of hyperparameters were considered and how were best hyperparameters selected.

- 10 pts Missing details e.g. hyperparameters chosen and details of how they were chosen missing or else very scant description given on what preprocessing or classification algorithms were used

- 10 pts Citation for original sources/libraries for either preprocessing or training algorithms is either missing or else improper/scant

+ 0 pts Click here to replace this description.

QUESTION 2

## 2 Coding 76 / 80

+ 0 pts Marks to be given as point adjustment

+ 0 pts Unanswered

- 3 pts Missing group number on first page

- 2 pts Missing group member names on first page

+ 76 Point adjustment

Time Taken: 2.601566 Marks: 8

Char Count Accuracy: 1.0 Marks: 20.0

Char Match Accuracy: 1.0 Marks: 40.0

Size: 453255 Marks: 8

Total Marks: 76.0

Total marks rounded up to nearest multiple of 0.5 marks
